

# BEADEx® PAPER FACED METAL DRYWALL BEAD

## DESCRIPTION

### FEATURES & BENEFITS

#### We went head-to-head and won corner-to-corner.

- Increase productivity. Decrease labor costs
- Installs faster than bare metal bead.
- Backed by a limited-lifetime, no-edge-crack warranty for long-term performance.
- Offers high-quality straight lines for interior architectural features.
- Available in a variety of profiles to maximize design flexibility.
- Durable paper facing reduces paint-and-compound chipping.

USG Beadex® paper faced metal corner bead can be installed 38% faster than traditional metal bead. The executed projects with USG Beadex® had revealed that the half of the project with paper faced metal bead required less joint compound, and the crew increased their productivity, which saved a significant amount in labor costs. Moreover, because USG Beadex® paper faced metal bead does not require nails or screws; there is no risk of corner cracks. That means with USG Beadex® Drywall you not only saved time, but you also can save money on both installation and callbacks.

**Increase productivity. Decrease your labor costs. And stop callbacks due to corner cracks.**

## APPLICATION

### A range of professional tools to make your job easier.

Sheetrock™ Tools have been developed through years of extensive product research and interior construction site field-testing. From finishing knives to outside corner rollers, our tools are unsurpassed and allow professionals to work comfortably, efficiently and safely.
