SUBSTRATES

SECUROCK[®] BRAND GYPSUM-FIBER ROOF BOARD

1. IDENTIFICATION

Product identifier Securock[®] Brand Gypsum-Fiber Roof Board Synonym(s) Gypsum Panels, Drywall, Plasterboard, Wallboard **Recommended use** Exterior use **Recommended restrictions** Use in accordance with manufacturer's recommendations. Manufacturer / Importer / Supplier / Distributor information/Company name USG Middle East Ltd 7410 (WASIL) Street #23, Cross 76 (Right) Second Industrial City Dammam 34326 - 4201. Kingdom of Saudi Arabia Tel: +966 13 812 0995 / Fax: +966 13 812 1029 E-mail: info@usgme.com / marketing@usgme.com Website: https://www.usgme.com

2. HAZARD(S) IDENTIFICATION **Physical hazards**

Not classified.

Health hazards Not classified. **OSHA** defined hazards Not classified. Label elements Hazard symbol None. Signal word None Hazard statement None. **Precautionary statement** Prevention Observe good industrial hygiene practices. Response Get medical attention/advice if you feel unwell. Storage Store as indicated in Section 7. Disposal Dispose of in accordance with local, state, and federal regulations. Hazard(s) not otherwise classified (HNOC)

3. COMPOSITION/ Mixtures

INFORMATION ON INGREDIENTS

/	Mixtures				
1 5	Chemical name	CAS number	%		
	Calcium sulfate dihydrate (alternative CAS 10101-41-4)	13397-24-5	85		
	Cellulose	9004-34-6	<10		

Composition comments

All concentrations are in percent by weight unless ingredient is a gas.

The amount of respirable crystalline silica is less than 0.1%. The gypsum used to manufacture these panels contains respirable crystalline silica varying by source and over time, as determined by testing the gypsum bulk samples. Good work practices which minimize the extent of total dust generation should be followed, and actual employee exposure on a given jobsite must be determined by workplace industrial hygiene testing.

4. FIRST-AID MEASURES	 Inhalation Dust irritates the respiratory system, and may cause coughing and difficulties in breathing. Move injured person into fresh air and keep person calm under observation. Get medical attention if symptoms persist. Skin contact Contact with dust: Rinse area with plenty of water. Get medical attention if irritation develops or persists. Eye contact Dust in the eyes: Do not rub eyes. Flush thoroughly with water. If irritation occurs, get medical assistance. Ingestion Rinse mouth. Get medical attention if symptoms occur. Most important symptoms/effects, acute and delayed Under normal conditions of intended use, this material does not pose a risk to health. Dust may irritate throat and respiratory system and cause coughing. Indication of immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. General information Ensure that medical personnel are aware of the material(s) involved.
5. FIRE-FIGHTING MEASURES	 Suitable extinguishing media Use fire-extinguishing media appropriate for surrounding materials. Unsuitable extinguishing media Not applicable. Specific hazards arising from the chemical Not a fire hazard. Special protective equipment and precautions for firefighters Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Fire-fighting equipment/instructions Use standard firefighting procedures & consider the hazards of other involved materials. Specific methods Cool material exposed to heat with water spray and remove it if no risk is involved.
6. ACCIDENTAL RELEASE MEASURES	 Personal precautions, protective equipment and emergency procedures See Section 8 of the SDS for Personal Protective Equipment. Methods and materials for containment and cleaning up No specific clean-up procedure noted. For waste disposal, see Section 13 of the SDS. Environmental precautions Avoid discharge to drains, sewers, and other water systems.
7. HANDLING AND STORAGE	Precautions for safe handling Use work methods which minimize dust production. Avoid inhalation of dust and contact with skin and eyes. Wear appropriate personal protective equipment. Wash hands after handling. Observe good industrial hygiene practices. When moving board with a forklift or similar equipment, it is essential that the equipment be rated capable of handling the loads. The forks should always be long enough to extend completely through the width of the load. Fork spacing between supports should be one half the length of the panels or base being handled so that a maximum of 4' extends beyond the supports on either end. Follow traditional building practices; such as management of water away from the interior of the structure to avoid the growth of mold, mildew and fungus. Remove any building products suspected of being exposed to sustained moisture and considered conducive to mold growth from the job site. Gypsum panels are very heavy, awkward loads posing the risk of severe back injury. Use proper lifting techniques Conditions for safe storage, including any incompatibilities Store in a cool, dry, well-ventilated place. Store away from incompatible materials. Protect product from physical damage. Protect from weather and prevent exposure to sustained moisture. Gypsum Association literature (GA-801-07) recommends storing board flat to avoid damaging edges, warping the board and the potential safety hazards of the board falling over. However, in other situations, storing the board flat may cause a tripping hazard or exceed floor limit loads. If stacking board vertically, leave at least 4 inches from the wall to decrease the risk of falling board and no more than 6 inches to avoid too much lateral weight against the wall.

8. EXPOSURE CONTROLS/ PERSONAL PROTECTIONV

Occupational exposure limits US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	CAS number	Value	Form
Calcium sulfate dihydrate (alternative CAS 10101-41-4) (CAS 13397-24-5)	PEL	5 mg/m³	Respirable fraction
Cellulose (CAS 9004-34-6)	PEL	15 mg/m³ 5 mg/m³ 15 mg/m³	Total dust Respirable fraction Total dust
US. ACGIH Threshold Limit Values			

Components	CAS number	Value	Form
Calcium sulfate dihydrate (alternative CAS 10101-41-4) (CAS13397-24-5)	TWA	10 mg/m ³	Inhalable fraction
Cellulose (CAS 9004-34-6)	TWA	10 mg/m ³	

US. NIOSH: Pocket Guide to Chemical Hazards

Components	CAS number	Value	Form
Calcium sulfate dihydrate (Alternative CAS 10101-41-4) (CAS13397-24-5)	TWA	5 mg/m³	Respirable
Cellulose (CAS 9004-34-6)	TWA	10 mg/m³ 5 mg/m³ 10 mg/m³	Total Respirable Total

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls personal protective equipment

Provide sufficient ventilation for operations causing dust formation. Observe occupational exposure limits and minimize the risk of exposure.

Individual protection measures, such as personal protective equipment

Eye/face protection

Wear approved safety goggles.

Skin protection

Hand protection

It is a good industrial hygiene practice to minimize skin contact. For prolonged or repeated skin contact use suitable protective gloves.

Other

Normal work clothing (long sleeved shirts and long pants) is recommended.

Respiratory protection

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Use a NIOSH/MSHA approved air purifying respirator as needed to control exposure.

Consult with respirator manufacturer to determine respirator selection, use, and limitations. Use positive pressure, air-supplied respirator for uncontrolled releases or when air purifying respirator limitations may be exceeded. Follow respirator protection program requirements (OSHA 1910.134 and ANSI Z88.2) for all respirator use. Observe any medical surveillance requirements.

Thermal hazards

None

General hygiene considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Observe any medical surveillance requirements.

9. PHYSICAL AND CHEMICAL PROPERT

MICAL PROPERTIES Gypsum-Fiber panel. Not applicable. Physical state Vapor density Solid. Not applicable. Form Relative density Panel. 2.32 (H ² O=1) Color Solubility(ies) Gray to off-white. 0.26 g/100 g (H ² O) Odor Partition coefficient (n-o

10. STABILITY AND Reactivity	
10. STABILITY AND REACTIVITY The product is stable and non reactive under normal conditions of use, storage and	dtransport
Chemical stability	u transport.
Material is stable under normal conditions.	
Possibility of hazardous reactions	
Hazardous polymerization does not occur.	
Conditions to avoid	
Contact with incompatible materials.	
Incompatible materials	
Strong oxidizing agents. Strong acids.	
Hazardous decomposition products	
Calcium oxides, carbon dioxide, and carbon monoxide.	
11. TOXICOLOGICAL Information on likely routes of exposure	
INFORMATION Ingestion	
Not likely, due to the form of the product.	
Inhalation	
Mechanical processing may generate dust. Gypsum dust has an irritant action o	n mucous
membranes of the upper respiratory tract and eyes (1).	
Skin contact	
Under normal conditions of intended use, this material does not pose a skin haz	zard Gynsum was not found
to be a skin irritant (2).	Lara, Gypsuni was not round
Eves contact	
	tomp orary irritation (1)
Mechanical processing may generate dust. Direct contact with eyes may cause t	temp orary initation (1).
Symptoms related to the physical, chemical and toxicological characteristics	ltb
Under normal conditions of intended use, this material does not pose a risk to hea	IIII.

	Information on toxicological effects			
	Acute toxicity			
	Low hazard.			
	Skin corrosion/irritation			
	Gypsum was not found to be a skin irritant.			
	Serious eye damage/eye irritation			
	Gypsum does not cause serious eye damage	or irritation.		
	Respiratory or skin sensitization			
	Respiratory sensitization			
	No data available, but based on results fro	m the skin se	nsitization study, calcium sulfate is not	
	expected to be a respiratory sensitizer.			
	Skin sensitization			
	Not a skin sensitizer (2).			
	Germ cell mutagenicity			
	No evidence of mutagenic potential exists (3,	4,5).		
	Carcinogenicity			
	No evidence of carcinogenic potential exists (OSHA Specifically Regulated Substances		1001 1050)	
	Not listed.	29 CFR 1910.	.1001-1050)	
	Reproductive toxicity			
	No evidence of reproductive toxicity exists (2)		
	Specific target organ toxicity - single exposu			
	Not toxic to lung tissue.			
	Specific target organ toxicity - repeated exp	osure		
	Not toxic to lung tissue (6).			
	Aspiration hazard			
	Due to the physical form of the product it is r	ot an aspirati	ion hazard.	
	Further information			
	Pre-existing skin and respiratory conditions in	cluding derm	natitis, asthma and chronic lung disease	
	might be aggravated by exposure.			
12. ECOLOGICAL	Ecotoxicity

14. TRANSPORT INFORMATION	DOT Not regulated as dangerous goods. IATA Not regulated as a dangerous good. IMDG Not regulated as a dangerous good. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable. This product is a solid. Therefore, bulk transport is governed by IMSBC code.
15. REGULATORY INFORMATION	Saudi Arabian Inventory of Chemical Substance:CAS#13397-24-5Calcium sulfate dihydrateCAS#9004-34-6Cellulose
16. OTHER INFORMATION, INCLUDING DATE OF PREPARATION OR LAST REVISION	Issue date 20-January-2021 Revision date 25-September-2022 Version # 02 Further information The International Agency for Research on Cancer (IARC) in June, 1987, categorized continuous filament glass fibers as not classifiable with respect to human carcinogenicity (Group 3). The evidence from human as well as animal studies was evaluated by IARC as insufficient to classify continuous filament glass fiber as a possible, probable, or confirmed cancer causing material. The ACGIH has established a TLV (Threshold Limit Value or recommended exposure limit) for continuous filament glass fiber of 1 fiber per cubic centimeter of air for respirable fibers and 5 mg per cubic meter of air for inhalable glass fiber dust. These levels were established to prevent mechanical irritation of the upper airways. IARC, NTP (US National Toxicology Program) and OSHA (US Occupational Safety and Health Administration) do not list continuous filament glass fibers as a carcinogen. As manufactured, continuous filament glass fibers in this product are not respirable. Continuous filament glass products that are chopped, crushed or severely mechanically processed during manufacturing or use may contain a very small amount of respirable particulate, some of which may be glass shards. NFPA Ratings: Health: 1 Flammability: 0 Physical hazard: 0 Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe NFPA Ratings:
